### IN SHORT:

Please provide the following items on the stage at the grand piano BEFORE THE ARTISTS ARRIVE.

- 1 Power connection at the grand piano
- 2 microphone connections XLR (phantom power) AND 1 cinch OR 1 mini-jack connection
- 1 stand for grand piano microphone
- 2 announcement microphones (no headsets), wireless at best
- 1 small table (for laptop)
- 1 HDMI input with connection to projector / LED screen

### IN DETAIL:

#### **Stage equipment:**

The recommended instrument is a concert grand piano of the brand Blüthner, Steinway, Schimmel or Yamaha (min. 2.00 meters). Other brands or models only by prior arrangement. If a grand piano is not available, it can be booked with the artists for an additional charge.

In addition, TWO height-adjustable piano benches of the same type are required.

The minimum dimensions for the stage are: 4.00 x 3.00 meters.

Alignment of the piano: usually centered, keys 90° to the edge of the stage.

Directly at the grand piano, please provide the power connection mentioned above.

#### **Sound equipment:**

Generally, a moderation sound system with an announcement microphone is required. Wireless microphones are best, but not headsets. Additionally a stand.

A suitable PA must be available to acoustically amplify the piano. Generally, Pianotainment brings its own grand piano microphone system: AKG C414 stereo pair (phantom power!).

The laptop of Pianotainment has to be positioned invisible for the audience to the left of the grand piano (e.g. small table) and connected to the PA. Audio output: Cinch or mini jack

#### **Lighting:**

At least two settings are needed. A dimmed, rather romantic lighting and a standard lighting with focus on the grand piano and the artists!

#### **Projector and screen (optional):**

If projector and screen are available, an HDMI connection directly from the grand piano to the projector is required.

If a sufficiently long HDMI cable is not available, please inform us.
